

# Environmental Responsibility & Sustainable Logistics

## Cargo Connect UK

At **Cargo Connect**, we recognise the environmental impact of road transport and the responsibility logistics providers have in supporting a more sustainable future.

We are committed to reducing carbon emissions across our UK transport operations through efficient route planning, modern low-emission vehicles, responsible fuel management and environmentally responsible operational practices.

Our goal is to deliver **reliable, compliant and sustainable haulage services across the United Kingdom**, while continuously improving our environmental performance.

## Reducing Carbon Emissions in Transport

Cargo Connect actively works to lower the carbon footprint of our logistics operations.

We achieve this through:

- **Efficient route planning** to minimise unnecessary mileage
- **Optimised load management** to reduce empty running
- **Fuel monitoring systems** to track fleet efficiency
- **Driver training in eco-driving techniques**

By improving operational efficiency, we reduce fuel consumption while maintaining reliable delivery services for our clients.

## Modern Low-Emission Fleet

Cargo Connect supports environmentally responsible transport through the use of **modern vehicles that meet current UK emission standards**.

Our fleet strategy includes:

- Operation of **Euro 6 compliant vehicles**
- Continuous fleet maintenance to ensure optimal engine efficiency
- Gradual transition towards **lower-emission and alternative fuel vehicles** where operationally

viable

- Evaluation of **electric vehicle solutions where practical**

As technology evolves, we aim to integrate cleaner transport solutions into our logistics network.

## Responsible Tyre Disposal Management

Tyres represent an important environmental responsibility within the transport industry.

Cargo Connect follows responsible tyre management practices by:

- Using professional tyre service providers
- Ensuring **legal tyre disposal and recycling** through authorised waste partners
- Monitoring tyre condition to extend usable life and improve safety
- Maintaining documentation of tyre disposal where required

This approach supports environmental protection while maintaining safe fleet operations.

## Fuel Efficiency & Operational Controls

Fuel consumption remains one of the most significant environmental factors in road transport.

To improve efficiency, Cargo Connect implements:

- Fuel monitoring across the fleet
- Route optimisation to reduce distance travelled
- Reduced vehicle idling
- Driver awareness on fuel-efficient driving behaviour

These measures help lower emissions and support more sustainable logistics operations.

## Electric & Alternative Vehicle Strategy

While heavy transport currently relies heavily on diesel engines, Cargo Connect monitors industry developments in **electric and alternative fuel vehicles**.

Where operationally viable, we support:

- Evaluation of **electric commercial vehicles**
- Adoption of **low-emission transport technologies**
- Integration of environmentally efficient vehicles in future fleet planning

## SIIAP LTD T/A CARGO CONNECT

Company number : 14749322 VAT: GB442143135

Head office : 12 Tudor Street , New Rossington , DN11 0JF ,Doncaster

Operational Centre : Plumtree Farm Industrial Estate , Plumtree Rd, Bircotes, DN11 8EW Doncaster

Mobile: +44 7898584175 Landline: +44 1302456731

Email: [office@cargo-connect.co.uk](mailto:office@cargo-connect.co.uk)

[www.cargo-connect.co.uk](http://www.cargo-connect.co.uk)

Our long-term strategy is to support the transition towards **cleaner logistics solutions in the UK haulage sector.**

## Compliance with UK Environmental Regulations

Cargo Connect operates in accordance with all relevant **UK environmental legislation and transport regulations.**

This includes compliance with:

- Commercial vehicle emission standards
- Environmental waste and disposal regulations
- Responsible maintenance and fleet management practices

By maintaining compliance and strong operational controls, we support environmentally responsible logistics across the UK supply chain.

## Continuous Environmental Improvement

Environmental performance is regularly reviewed to ensure that our operations remain efficient and responsible.

Cargo Connect continuously works to:

- Reduce operational emissions
- Improve fleet efficiency
- Support sustainable logistics practices
- Adopt new technologies that improve environmental performance

## Supporting Sustainable Logistics in the UK

Cargo Connect is committed to supporting a more sustainable transport industry by delivering reliable haulage services while actively reducing environmental impact.

Through responsible fleet management, efficient transport planning and environmentally compliant operations, we contribute to the development of **sustainable logistics across the United Kingdom.**
